

Mrs Byers was taken to Eldorado, this morning where proceedings inquiring into her sanity will be held, today. She has been in failing health for several months, but has only shown symptoms of her mind being unbalanced the past month. The latter part of last week symptoms became more pronounced and the attending physician pronounced her of un sound mind. The decision was made to take her before the proper authorities. The family has the sympathy of everyone and it is to be hoped that restoration of bodily health will bring a return of reason.
