

AFTER 40 YEARS' PRODUCTION MINE IS BETTER THAN EVER

Morning Property Has
Greater Volume of Ore
in Sight Than Before.

NEW JERSEY MINE CUTS RICH VEIN

After producing by continuous operations for 40 years nearly \$25,000,000 in dividends, the great Morning mine of the Cœur d'Alene now has a greater volume of ore in sight than at any previous time in its history. This great ore yet to be mined is higher grade than the average of what the mine has produced in the past. Besides this, the owners, the Federal company, have discovered that the ore body in the Pigeon mine is much more extensive than previously known to be.

The Morning shaft has been lowered 200 feet deeper, and a crooked run to the vein where the ore has been found "bigger and better" than ever before. This is the 2650-foot level.

Assay Rich.

In addition the company, becoming curious to know what was still deeper in this rich mine and sank three diamond drill holes at angles from the 2650 to the 2550 foot level and the assays of the cores show that the ore still grows richer with this great depth. Its extent is apparently as great on the 2550-foot level as on those above.

This level, yet to be opened, will be an actual depth of more than a mile from the apex, for the measurements are from the No. 5 tunnel level.

Ore Blocked Out.

The company has done no mining below the 2550-foot level, so it has ore 600 feet deep that averages more than 15 feet wide and is 1500 feet long—one of the greatest and richest bodies of untouched ore ever blocked out in the Cœur d'Alene.

It will be some time before the company will need to touch this ore body below the 2550-foot level, for

WATER POWER STOCK STRONG

Closes at Stock Exchange
at \$101—Tamarack and
Sherman Gain.

Washington Water Power stock is strong today on the Standard Stock Exchange, closing this morning with bidding at \$101.

Tamarack and Sherman, among

the mines, each gained a cent since yesterday morning.

Jack Wallis was the heavy trader again, the sales totaling 12,000 shares. It closed at 51 $\frac{1}{2}$ and 10 cents.

Sales in all issues totaled 17,515 shares.

Morning Sales.

Sales at the morning call today were as follows: Bunker Hill, 5 \$71.50; Colocoda, 500 77c; Idaho 15 $\frac{1}{2}$; L.C. 500 76 $\frac{1}{2}$; 500 75c; Jack Walla, 2000 74c; 7000 19c; Colocoda, 1900 75c; Montana Mine, 500 24c; 1250, 500 34c; B20; Noble Pine, 1000 12c; Washington Water Power, 10 50c.

Closing Morning Prices.

Quotations at the close of the morning call were as follows:

The following prices today's news sheet:

WHEAT IS EASY ON BEAR REPORT

CHICAGO, April 11. (A.P.)—Prospects of cooler showery conditions in drought districts eased wheat values down today in the late dealings here, although general rain was not expected. Persistent selling out of May wheat holdings was the main transaction factor, together with slackness of export demand today for wheat from North America.

Comprehensive reports received indicated that continuance of hot dry windy weather would bring material increase in corn production, damage to the maize crop from Lawrence, Okla., and all vegetation.
